

**SCF Annual Forum**  
25th April 2017 Exeter  
26th April 2017 Winchester  
27th April 2017 London

*“Stability in uncertain times”*

*Thank you!*

*Dear delegate,*

The SCF team would like to thank those of you for your attendance and contribution to the three events we held across the framework region. We very much enjoyed the events, and we felt it was important for us to meet with yourselves, and the contractors so that we can understand where we can improve, and how we can better meet your expectations. As part of the future focus sessions, we have summarised three key areas for us to concentrate on in the third year of the framework:

1. Several issues were raised over the three days around the engagement of the supply chain. This is an area that the SCF managers are keen to explore, and will build upon work done in year two, taking on board the comments received.
2. How can we make better use of the learning from the large number of projects delivered by the framework? There were many suggestions from delegates which we will review over the year, and try to put in place some effective shared learning for the benefit of our SCF community
3. Many delegates were impressed with the data captured by the SCF, and we will be looking to improve the way we use and feed back the outputs for the benefit of the SCF managers, contractors and clients alike.

Whilst we will look to do as much as we can in these areas, we will of course continue with our existing commitments in the areas of social value, and will support our clients to get the best out of the framework. Please feel free to contact any of the framework managers.
